Human Resources Data Set Submission Guide

for Fiscal Year 2025

Updates to Human Resources File

No edits for SFY25.

Human Resources File Data Conventions

Field Types

- 1. Numeric (#) Must contain only numeric characters 0-9
- 2. Alpha/Numeric (X) Can contain both letters and numbers (letters should always be in upper case)

 No special characters like dash, slash, or commas unless specifically authorized.

Field Formats

- 1. # numeric digit
- 2. X any character (letters and numbers allowed, letters in upper case only)
- 3. YYYYMMDD numeric date field in the form:

YYYY - four digit year MM - two digit month DD - two digit day

Note: Dates should contain only numeric characters. Do not enter date separators, such as "/" or "-" in these fields.

Standard Codes

Standard coding methodology is used throughout the data set whenever possible. Some examples are:

1. For fields requiring a "Yes" or "No", the codes are:

ON C

1 Yes

2. Codes for "Not Applicable" are dependent on field length, and always end in "6". This code is used to indicate that the field does not apply to the client. An example would be the Pregnant Women field for male clients. Those fields which have Not Applicable as valid codes use the coding convention below:

<u>Code</u>	Field Length
6	1
96	2
etc.	

3. Codes for "Unknown" are dependent on field length, and always end in "7". IPOP would prefer that this code NOT be used unless the Center wants to capture the difference between Unknown and Not Collected. The Not Collected code is the recommended code for this information. Both codes will be treated in the same manner. Both could count against the Completeness Standard. Those fields which have Unknown as valid codes use the coding convention below:

<u>Code</u>	Field Length
7	1
97	2
etc.	

4. Codes for "Not Collected" are dependent on field length, and always end in "8". This code is used by TEDS to indicate a field that is not collected. Kentucky uses it to indicate that the data was not collected from the client, but that the field is one that Kentucky collects. Both this code and the previous code ate treated in the same manner. Both could count against the Completeness Standard. Those fields which have Not Collected as valid codes use the coding convention below:

Code Field Length
8 1
98 2
etc.

3. Codes for "Other" are also field length specific, but always end in "9".

Code	Field Length
9	1
99	2
etc.

Note: Region Number and System Reporting Date are extracted from the identification of the input file. These fields are NOT part of the submission record.

Note: The new fields are NOT to be counted for Accuracy or Completeness during the first Fiscal Year of activity.

IPOP fields "Region_Number" and "System_Reporting_Date" will be taken from the input file identification.

Employment and Separation Dates will be used to track broken employment for the same staff member.

Please do NOT re-use the Staff Identifier, if at all possible.

ALL staff members who have direct contact with clients MUST be included in this data set. All other staff members MAY be included at the Center's choice.

Note: Starting in FY 2006, HR data is retained on a monthly basis so all staff MUST be submitted at the beginning of each fiscal year. Only additions, changes and separations MUST be entered for the months following although all staff may be entered each month.

Under the Errors column;

F = Fatal error - field vital to record, entire record rejected, no further edit checks are performed

G = General error - invalid value, data recorded for reporting purposes, value changed to Unknown / Not Collected code.

NOTE: NOT counted in completeness accumulation

P = Possible error - value in this field should be reviewed if it is outside normal bounds or is in conflict with another field

Note: Human Resources records for staff who have been separated are still being edited for valid codes in all fields. However, any errors in these records are counted as Possible Errors only, and are not accumulated or counted against the Center.

C = Completeness - this field checked against Not Collected code.

Timeliness Standard FAILS if final submission is not completed by the last day of the month following the Reporting Period.

Fatal Error Standard FAILS if any fatal field has more than 1.0% invalid values. See "Standards for Information Quality" for a list of fatal fields.

General Error Standard FAILS if any non-fatal field has more than the maximum error rate of invalid values allowable for the field. See "Standards for Information Quality" for a list of non-fatal fields and maximum error rate.
