What is Strengthening Families?

1. This is more about connecting the things you are already doing and already have in place,

2. This is not a replacement program or a new initiative- it’s a movement to create a common language and common approach and,

3. It is making the invisible, visible, and the visible more intentional.
Why am I here today?

Strengthening Families is about getting on the same page so we can be better together.
KYSF is part of the System of Care

What it looks like to access services for families now

What is our hope for the future

Kentucky Strengthening Families
Leadership Team

- Governor’s Office of Early Childhood
- Department for Public Health, Division of Maternal and Child Health
- Cabinet for Health and Family Service, Office of Policy and Budget
- Children, Inc.
- Department for Behavioral Health, Developmental and Intellectual Disabilities
- Department for Community Based Services, Division of Child Care
- Department for Community Based Services, Division of Protection and Permanency
- Department of Education
- Department for Libraries & Archives
- Department for Medicaid Services and Kentucky Children’s Health Insurance Program (KCHIP)
- Family Resource and Youth Services Centers
- Kentucky Chapter of the American Academy of Pediatrics
- Kentucky Commission for Children with Special Health Care Needs
- Kentucky Partnership for Families and Children, Inc.
- Metro United Way
- Prevent Child Abuse Kentucky
- Prichard Committee for Academic Excellence

And growing everyday 😊
Learning objectives: After completing this course, you should be able to:

1. **List and explain each of the 6 Protective factors**

2. **Recognize** the importance of Strengthening Families based on the research behind the movement

3. **Identify** strategies for how your program can align current program practices with the 6 Protective Factors

4. **Develop a plan** for how you will promote the 6 protective factors in your workplace so every interaction you have with families is strength-based and high impact.
What is a Protective Factor?

A protective factor is a characteristic that makes a parent, child, or family more likely to thrive and less likely to experience a negative outcome. A protective factor is like the flip side of a risk factor. You can also think of protective factors as what helps children and families thrive despite whatever risk factors they might face.

Definition adapted from National Alliance of Children's Trust and Prevention. (2014)
What is a Protective Factor, Cont.?  
The Strengthening Families protective factors were chosen on the basis of extensive research about children and families. They are not the *only* protective factors that keep families strong. They were selected because they are protective factors that can be built through interaction with the people and systems that families encounter in their day-to-day lives.

Definition adapted from National Alliance of Children's Trust and Prevention. (2014)
The 6 PFs are research based in that when these 6 PFs are present, regardless of the number of risk factors present in the home, the likelihood of child maltreatment greatly reduces and in exchange the rate of school readiness, children reaching optimal development and the strength of the family unit increases.

Definition adapted from National Alliance of Children's Trust and Prevention. (2014)
“What I know: Families thrive when protective factors are robust in their lives and communities”
Leadership Team and Background
- Six Protective Factors vs. Five from CSSP

Cross-system, multi-sector leadership
- Goal is to create supports for all families through systems change; all families go through times of stress
- Families we care about are touched by many systems
- Systems face lots of transitions and uncertainty
- Workers often transition between systems

FAMILY defined as any adult caring for a child
- biological parent
- Foster/adoptive parent
- grandparent
- other relative
- self-defined family member
- educator
- child care provider
- friend or neighbor

Kentucky’s Approach
Created by Kentucky Strengthening Families Leadership Team (June 2014)
MISSION:
Kentucky is strengthening families, promoting knowledge and skills, and providing access to resources and support by enhancing protective factors through family, community and state partnerships.

VISION:
All Kentucky children are healthy, safe and prepared to succeed in school and in life through families that are supported and strengthened within their community.
“What I know: Families thrive when protective factors are robust in their lives and communities”
1. Parental Resilience: Families bounce back. Managing stress and moving forward when faced with challenges, adversity and trauma

What it looks like:
· Families exhibit strength and flexibility to general life stress.
· Families recognize and value their unique strengths.
· Families identify themselves as hopeful, optimistic, and confident.
· Families have strong problem solving skills.
· Families practice regular self care to keep stress from interfering with nurturing their child.

What did it look like for you?
2. Social Connections:

*Families have friends they can count on.* Having positive relationships that provide emotional, informational and spiritual support

**What it looks like:**
- Families maintain multiple friendships and supportive relationships with others.
- Families feel respected and appreciated in their role as parent or primary caregiver.
- Families accept help from others and give help to others.
- Families establish connections and a sense of belonging with other families.

*What did it look like for you?*
3. Knowledge of Child Development:

*Families learn how their children grow and develop.* Understanding child development and parenting strategies that advance physical, cognitive, language, social and emotional development

**What it looks like:**
- Families identify realistic expectations for their child's development.
- Families possess a commitment to lifelong learning.
- Families practice positive discipline techniques to effectively manage their child's behavior.
- Families recognize and respond appropriately to their child's specific developmental needs.

*What did it look like for you?*
4. Concrete Support in Times of Need: *Families get assistance to meet basic needs.* Accessing resources that address a family's basic needs, resulting in minimizing stress caused by challenges

**What it looks like:**
- Families sustain adequate financial security to meet basic needs.
- Families feel safe in their living environment.
- Families understand what resources their family needs.
- Families advocate for and receive concrete supports when needed.
- Families have information and connections to services in their community.
- Families feel supported and valued when reaching out for help.

*What did it look like for you?*
5. Social and Emotional Competence of Children: 

Families teach children how to have healthy relationships. Establishing family and child interactions that help children develop the ability to recognize, communicate, and regulate their emotions.

What it looks like:
- Families encourage and reinforce positive social skills and set limits in a positive way.
- Families foster their child’s age appropriate self-regulation.
- Families help their child manage and communicate feelings.
- Families understand the importance of social and emotional development in young children.

What did it look like for you?

Created by Kentucky Strengthening Families Leadership Team (June 2014)
6. Nurturing and Attachment: *Families ensure children feel loved and safe.* Fostering a nurturing family environment where young children develop secure bonds with caring adults

**What it looks like:**
- Families respond to their child with warmth and consistency that fosters a strong and secure attachment.
- Families help their child to trust that their environments are safe.
- Families recognize and embrace their child’s strengths and individuality.
- Families teach their child how to form and maintain healthy relationships with others.

*What did it look like for you?*
Looking Back....

The Protective Factors from Your Childhood

Then who or what made that difference for you...?
“What I know: Families thrive when protective factors are robust in their lives and communities”
THREE CORE CONCEPTS IN EARLY DEVELOPMENT

1. **Experiences Build Brain Architecture**
2. **Serve & Return Interaction Shapes Brain Circuitry**
3. **Toxic Stress Derails Healthy Development**

Video clips retrieved from Center on the Developing Child at Harvard University. (2014, January 1).
### Early Experiences Matter for a Lifetime

**What The Research Tells Us:**

<table>
<thead>
<tr>
<th>THEN...</th>
<th>&amp;</th>
<th>NOW:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Brain development depends on genes.</td>
<td>&amp;</td>
<td>Brain development hinges on complex interplay between genes &amp; experiences.</td>
</tr>
<tr>
<td>Experiences before age 3 have limited impact later in life.</td>
<td>&amp;</td>
<td>Experiences before age 3 have decisive impact on adult capabilities.</td>
</tr>
<tr>
<td>Secure attachment creates favorable context for early development and learning.</td>
<td>&amp;</td>
<td>Secure attachment directly effects the way the brain is wired and reduces long-term consequences for health and learning.</td>
</tr>
<tr>
<td>Brain development is linear across all knowledge areas and skills.</td>
<td>&amp;</td>
<td>Brain development is non-linear including prime times for different knowledge areas &amp; skills.</td>
</tr>
<tr>
<td>Toddler’s brain less active then adult’s, for example busy college student.</td>
<td>&amp;</td>
<td>Toddler’s brain is twice as active as adult brain – activity drops during adolescence &amp; doesn’t recover.</td>
</tr>
</tbody>
</table>

Toxic
Prolonged activation of stress response systems in the absence of protective relationships, which can produce physiological changes that lead to lifelong problems in learning, behavior, and health.

Tolerable
Serious, temporary stress responses, buffered by supportive relationships.

Positive
Brief increases in heart rate, mild elevations in stress hormone levels.
Structural Brain Changes due to Early Experiences

Healthy Brain
This PET scan of the brain of a normal child shows regions of high (red) and low (blue and black) activity. At birth, only primitive structures such as the brain stem (center) are fully functional; in regions like the temporal lobes (top), early childhood experiences wire the circuits.

An Abused Brain
This PET scan of the brain of a Romanian Orphan, who was institutionalized shortly after birth, shows the effect of extreme deprivation in infancy. The temporal lobes (top) which regulate emotions and receive input from the senses, are nearly quiescent. Such children suffer emotional and cognitive problems.
Adverse Childhood Experiences (ACE) Study

- Kaiser study
- 18,000 middle class enrollees
- Categories of trauma experienced in childhood such as:
  - Physical abuse
  - Emotional abuse
  - Domestic violence
  - Substance abuse in home
  - Mental illness in parent
  - Lost parent due to separation or divorce
  - Household member in jail

Information retrieved from Center for Disease Control and Prevention. (2014, May 13)

American Journal of Preventive Medicine 1998; 14:245-258
Nearly 18,000 involved

Middle class, average age of 57

80% white, 10% black, 10% Asian

74% some college; 44% graduated college

49.5% men

American Journal of Preventive Medicine 1998; 14:245-258

Information retrieved from Center for Disease Control and Prevention. (2014, May 13) About the study
Adverse Childhood Experiences (ACE) Study

<table>
<thead>
<tr>
<th>ACE Score</th>
<th>Women</th>
<th>Men</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>34.5%</td>
<td>38</td>
<td>36.1%</td>
</tr>
<tr>
<td>1</td>
<td>24.5%</td>
<td>27.9%</td>
<td>26.0%</td>
</tr>
<tr>
<td>2</td>
<td>15.5%</td>
<td>16.4%</td>
<td>15.9%</td>
</tr>
<tr>
<td>3</td>
<td>10.3%</td>
<td>8.6%</td>
<td>9.5%</td>

ACE Score

0 1 2 3 4 or more

Absenteeism (>2 days/month)

Serious Financial Problems

Serious Job Problems

American Journal of Preventive Medicine 1998; 14:245-258
ADVERSE CHILDHOOD EXPERIENCES are **the most basic and long lasting cause** of:

health risk behaviors,
mental illness,
social malfunction,
disease, disability, death, and healthcare costs

Information retrieved from Center for Disease Control and Prevention. (2014, May 13)

American Journal of Preventive Medicine 1998; 14:245-258
ACEs and Adult Disease

54% of depression
58% of suicide attempts
39% of ever smoking
26% of current smoking
65% of alcoholism
50% of drug abuse
78% of IV drug abuse
48% of promiscuity (>50 partners)

are attributable to ACE’s.

American Journal of Preventive Medicine 1998; 14:245-258

Information retrieved from Center for Disease Control and Prevention. (2014, May 13)
Research Behind Strengthening Families

Relating the Protective Factors and this research about early experiences personally
The availability of a **caring and responsive adult** greatly reduces the risk that circumstances will lead to excessive activation of stress response systems that lead to physiologic harm and long-term consequences for health and learning.

The context to establish the early roots of physical and mental well-being include:

- A stable and responsive environment of relationships
- Safe & supportive physical, chemical, and built environments, &
- Sound and appropriate nutrition
How does what we know about ACES and Protective Factors guide our work moving forward?

What’s going to be different?
# Attitude Shift for Family Support

In Kentucky Strengthening Families, we have a shared commitment to:

- Promoting strong families and healthy development for families **prenatally through age five**
- **Partnering with all families** and celebrating differences
- Using protective factors as a **strengths-based** philosophy to buffer for toxic stress
- Building knowledge **and skills** for individual and system change
- Creating safe, stable and nurturing environments for people to have **responsive and caring relationships**
The Strengthening Families Approach

• Benefits ALL families
• Builds on family strengths, buffers risk, and promotes better outcomes
• Builds on and can be integrated into existing
  – programs,
  – strategies,
  – systems and
  – community opportunities.
• Promotes optimal development of young children by strengthening their families through the 6 Protective Factors.

“What I know: Families thrive when protective factors are robust in their lives and communities”
What Now? Next Steps for Service Providers

Sounds good to me!
Be a Leader in the Strengthening Families Movement:

1. Start with one family - How will you partner with them to build all 6 Protective Factors?

2. Complete your action plan. Who will you partner with to realize this plan?

Kentucky Strengthening Families

A Framework for Supporting Kentucky’s Families

An Overview Training for Service Providers
Kentucky’s Six Protective Factors

1. **Parental Resilience:** *Families bounce back.* Managing stress and moving forward when faced with challenges, adversity and trauma.

2. **Social Connections:** *Families have friends they can count on.* Having positive relationships that provide emotional, informational and spiritual support.

3. **Knowledge of Child Development:** *Families learn how their children grow and develop.* Understanding child development and parenting strategies that advance physical, cognitive, language, social and emotional development.
Kentucky’s Six Protective Factors Cont.

- 4. Concrete Support in Times of Need: *Families get assistance to meet basic needs.* Accessing resources that address a family's basic needs, resulting in minimizing stress caused by challenges.

- 5. Social and Emotional Competence of Children: *Families teach children how to have healthy relationships.* Establishing family and child interactions that help children develop the ability to recognize, communicate, and regulate their emotions.

- 6. Nurturing and Attachment: *Families ensure children feel loved and safe.* Fostering a nurturing family environment where young children develop secure bonds with caring adults.
